linkedin.com/in/victorlaitila | **github.com/victorlaitila** | **www.victorlaitila.com**

Full-stack software engineer and consultant with an M.Sc. in Software & Service Engineering and nearly 5 years of production experience across large-scale industrial software, modern web systems and AI-driven development. Currently embedded in an ABB product team, owning features end to end and working closely with stakeholders. Hands-on with LLM integrations, agentic workflows, skills and MCP servers across professional and personal projects.

PROFESSIONAL EXPERIENCE

Software Consultant - Gofore **07/2026 - Present**

- Continuing development of ABB's Drive Composer 3 as an embedded consultant within the client's team.
- Working closely with product stakeholders on requirements and technical solutions, and presenting the results.

Software Developer - ABB **05/2023 - 07/2026**

- Closed 350+ tickets (features, bug fixes, refactoring) in Drive Composer 3, a large-scale industrial software product.
- Owned complex full-stack features from architecture to release (**Vue**, **TypeScript**, **C#/.NET**, **Azure DevOps**, **Git**).
- Refactored a core **Vue** module for performance and maintainability: ~65% fewer props and events between components and up to ~60% lower memory use in heavy UI operations.
- Contributed to architecture discussions and technical documentation for team-wide development standards.
- Collaborated cross-functionally within an international **Scrum** team and gave regular stakeholder demos.

Software Developer - Teonos Oy **05/2022 - 03/2023**

- Developed and maintained core functionality in an online booking system (Slotti).
- Implemented production-ready front-end features using **Vue**, **TypeScript**, **AngularJS**, **Git** and **GitLab**.
- Contributed to a major refactoring effort, reducing technical debt and improving system performance and scalability.

SELECTED PROJECTS

AI Article Summarizer: React/TypeScript and Python (FastAPI) app that summarizes URLs, PDFs and text with a Hugging Face transformer model, backed by PostgreSQL, Docker and Sentry monitoring.

Dependency Risk Scanner: React/TypeScript and Node.js (Fastify) app that builds dependency graphs from lockfiles, scores package impact, adds OSV vulnerability data and explains risks with an LLM.

EDUCATION

Software & Service Engineering (M.Sc.) - Aalto University **09/2024 - 07/2026**

Minor: Machine Learning, Data Science and Artificial Intelligence

GPA: 4.86/5.0

Thesis: 'Design, Implementation, and Evaluation of an On-Device Voice User Interface for Industrial Drive Control' - 5/5

Automation & Robotics (B.Sc.) - Aalto University **09/2021 - 05/2024**

Minor: Computer Science

GPA: 4.83/5.0

SKILLS

Frontend: React, TypeScript, Vue.js, AngularJS, CSS, Tailwind CSS

Backend & Data: Python, Node.js, C#/.NET, SQL, NoSQL, Scala

Cloud, Testing & DevOps: Azure DevOps, Google Cloud, AWS, Docker, Git, GitHub Actions, Robot Framework

Engineering Practices: Agile Development, Software Architecture, REST APIs, CI/CD, Figma

AI: LLM APIs, Prompt Engineering, Agentic Coding (Claude Code, Codex, Copilot), Agent Skills, MCP Servers

Languages: English (Fluent), Finnish (Native), Swedish (Native)
